I support the effort to do away with morse code requirements. It is no longer
needed since many other means of communications such as satellite, internet
(which can be used through a satellite, satellite phones have made it possible
to communicate over long distances. SSB transmissions go very far and can be
sent in the clear. Other radio services such as commercial radio-telephone have
abandoned the morse requirement. Keep the morse code frequencies for those who
wish to use it, but do not make it mandatory. Tks Rafael Morales KC4FOF
